Lead Time Update: Currently 8 days Watch This Space As We Return To 5 Day Lead Times

Ranger implemented new software this past April that manages supply chain and production. Since then several software glitches came to light, causing unexpected shortages and affecting delivery times. This combined with two product launches, Transit and White Ladder Racks resulted in even more demand on production than planned. As a result our lead times temporarily increased to 12 days.

Over the past month we have been consistently reducing our lead times in view of returning to our normal 5 day service. We went from 12 days to 10 days and currently we are at 8 days. This is temporary and we are confident that we will soon return to our usual 5 day order lead times.

We apologize for any inconvenience that this has caused you or your customers. We would like to say "thank you" for your patience. We appreciate your business and your confidence in our brand.

Date to Remember Labor Day Holiday
